Premium wood species

PREMIUM

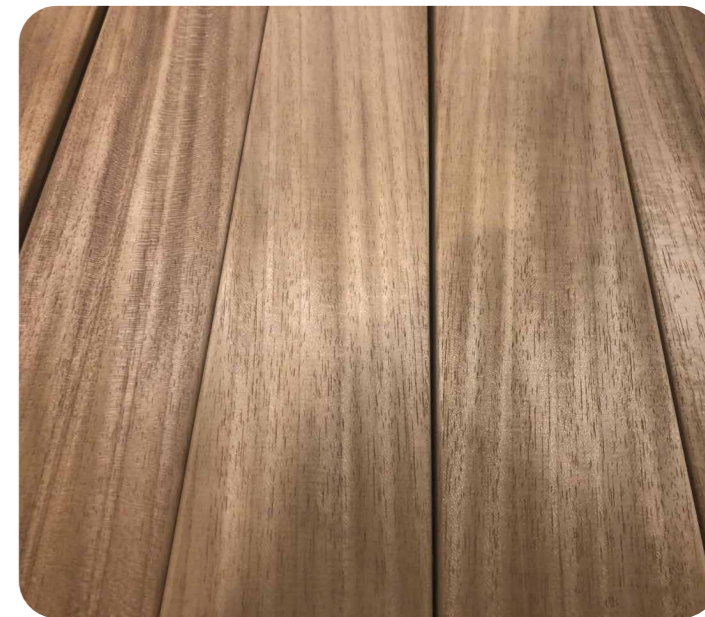

Premium wood species

As the producer, we can process different types of wood. For delighted clients we offer premium wood species such as Thermo Beech, Thermo Ash, Thermo Elm, Thermo Wild Black Cherry, originated in Russia.

We have wide range of suppliers who are attentive to the quality of the supplied to us raw materials.

Thermomodification

THERMO

Thermomodification

At our production site in Serpuhov we have our own kilns for thermomodification. By the request of client, corresponding to the ordered volumes, we can offer several degrees of thermomodification: light, medium, dark.

The most popular degree – medium, as the most of products in the presentation.

Optimized Logistics Service

WOOD-POINT LLC offers a unique service for the implementation of export logistics operations starting from FCA Serpuhov terms of delivery up to DDP Incoterms 2010.

We are experienced export-oriented company that with pleasure arranges logistics services to our clients.
